Mother's Day Fundraiser

Native Illinois Wildflower

Grasses Mix

Includes: Indian grass,
Sorghastrum nutans,
Turkey's Foot,
Andropogon gerardii, &
Prairie Dropseed,
Sporobolus heterolopis

About:

- Perennial (lives for more than 2 years)
- Indian Grass and Turkey's Foot can grow at the height of 3-7 feet tall & Prairie Dropseed at 1-2 feet tall
- Blooms in July-August
- Attracts a variety of birds
- Great as ornamental grasses

Growing Steps:

- Step 1: Chose an area that has some sunlight, shade, and won't be overcrowded by other plants.
- Step 2: Place 3 seeds in an area less than an inch under top layer of soil with spacing between 18-36 inches to your next seed placement. *Same go for pots. The bigger pot you have the more seeds you can put in it. **Note: can spread seeds and cover if you prefer to grow seeds that way.***
- Step 3: Cover seeds and water lightly. If seeds are outside, water daily. Germination should start within 2-4 weeks

Thank you for your
purchase and for
supporting the Harper
Biology Club.
