Mother's Day Fundraiser

Native Illinois Wildflower

Wild Bergamot, *Monarda
fistulosa*

About:

- Perennial (lives for more than 2 years)
- Grows at the height of 2.5-4 feet tall
- Blooms in June-July
- Great for aroma and teas
- Attracts a variety of pollinating insects and birds.

Growing Steps:

- Step 1: Chose an area that has some sunlight to light shade and won't be overcrowded by other plants.
- Step 2: Place 3 seeds in an area less than an inch under top layer of soil with spacing between 24-36 inches to your next seed placement. *Same go for pots. The bigger pot you have the more seeds you can put in it. **Note: can spread seeds and cover if you prefer to grow seeds that way.***
- Step 3: Cover seeds and water lightly. If seeds are outside, water

daily. Germination should start within 6-7 weeks

Thank you for your
purchase and for
supporting the Harper
Biology Club.
